Plantation — PLT Audit NCRs

Document owner: Plantation Office · Version: FY2025-A · Classification: Internal — Working

1. Executive Summary

This document is the working artefact for the plt audit ncrs use case in the plantation domain. It is staged for a Microsoft 365 Copilot Cowork / Notebook demo and contains plausible (illustrative) figures, lists, and narratives — not real customer data.

The intended demo flow: a plantation stakeholder asks Copilot to summarise, compare, draft, or distribute the contents of this file alongside related artefacts. Cowork fans the task out into 5 parallel sub-tasks. Notebook adds it as a source and answers grounded questions across all sources.

2. Headline metrics

Segment	FFB MT	CPO MT	Yield t/ha	OER %	Cost/MT
Estate A	44.9	60.0	78.8	94.8	63.6
Estate B	66.5	60.9	50.8	94.0	68.5
Estate C	43.7	86.9	56.3	62.8	61.9
Estate D	65.8	41.9	65.0	67.3	82.5
Mill 1	78.3	63.6	83.0	60.1	76.8
Mill 2	94.4	40.3	44.3	94.4	80.4

3. Scenario & Background

The Group is mid-cycle on its FY2025 close and is rolling forward into FY2026 planning. The plantation portfolio has surfaced a mix of on-track lines and corrective items. This plt audit ncrs captures the working position on those items so the Group office, the operating committee, and (where relevant) the regulator-facing officer can align on next steps.

The team has triangulated the working dataset against three peer benchmarks and against the regulator's published thresholds for the sector. Findings carried over from the prior cycle have been re-examined to test whether the original assumptions still hold under the FY2026 base case.

4. Key drivers and recovery levers

Driver	Owner	Status
Volume / Mix	CFO	On track
Pricing & Discount	COO	At risk
Cost Base Reset	CFO	On track
Capex Re-baseline	CFO	Behind
Regulatory Provisions	CRO	Mitigated
Productivity / Automation	CTO	On track
Working Capital	CFO	On track
Talent / Headcount	CHRO	At risk

5. Open items and unknowns

• Top customer concentration: monitor monthly until below 18 %.

• Top vendor exposure: dual-source by end Q2 FY2026.

• Regulator submission cycle: align on April / July / October cadence.

• Board KPI #1: green status confirmed after Q4 close.

• Board KPI #2: amber — driver tree refresh in flight.

• ESG signal — emissions: Scope 1 reduction track on plan; Scope 3 under refinement.

• Talent — critical roles: 4 vacancies open more than 60 days; offers in progress.

• Liquidity buffer: more than 35 days; covenant headroom unchanged.
