

Asianova Systems — RFP Response

Submission for: Zava Conglomerate — Group-Wide Cloud Modernisation RFP-2026-04

Submitted: 2026-04-22 · Vendor HQ: Jakarta · Reference: ZAVA/VendorC/0426

1. Executive Summary

Asianova Systems is pleased to respond to Zava Conglomerate's Group-Wide Cloud Modernisation RFP. We propose a 36-month engagement covering migration assessment, landing-zone build, application re-platforming for 24 priority workloads, and run-state managed services across GCP, AWS.

Our delivery is anchored in 99.5% availability commitment, 8x5 business hours support model, and certifications: ISO 27001. Total Contract Value (TCV) over 36 months: MYR 4,320,000 (inclusive of professional services, licence pass-through, and run-state).

2. Technical Approach

2.1 Landing-Zone — We will deliver a hub-and-spoke landing zone on GCP, AWS aligned to the GCP Well-Architected Framework. Identity federates through Zava's Entra ID tenant. Networking uses dedicated ExpressRoute / Direct Connect circuits with 99.95% SLA.

2.2 Migration Wave Plan — 24 workloads grouped into 4 waves of 6 each, sequenced by business criticality. Wave 1 (low-risk): file shares, dev/test, internal portals. Wave 2: data warehouse, analytics. Wave 3: ERP + payroll. Wave 4: customer-facing transactional systems.

2.3 Re-platforming Strategy — 6 lift-and-shift, 10 re-platform (containerise), 6 refactor (cloud-native), 2 retire. Each workload has its own runbook, rollback plan, and DR pair.

2.4 Security — Zero-Trust model, MFA on all admin accounts, JIT access via PIM, KMS-managed keys (BYOK option), CSPM tooling, and continuous compliance scanning against ISO 27001.

3. Commercial

Line Item	Year 1	Year 2	Year 3	Total (MYR)
Professional services (migration)	1944k	648k	—	2592k
Run-state managed services	216k	648k	864k	1728k
Licence pass-through (capped)	as consumed	as consumed	as consumed	metered
Total commitment	2160k	1296k	864k	4320k

3.1 Payment Terms — Net 45 from invoice. 10% retention on Year 1 professional services, released on go-live sign-off per wave.

3.2 Pricing Validity — 90 days from RFP submission date.

3.3 Price Escalation — CPI+1% annual cap on run-state from Year 2 onwards. Professional services rate card fixed for Year 1.

4. SLA & Support

4.1 Availability SLA: 99.5% measured per workload per calendar month.

4.2 Support model: 8x5 business hours. P1 response 15 min, P2 30 min, P3 4 hours.

4.3 Service credits: 10% of monthly run-state fees per 0.1% below SLA, capped at 25%.

5. Compliance & Certifications

Asianova Systems holds the following certifications relevant to this engagement: ISO 27001.

Data residency: all customer data remains within Malaysia / ASEAN region as required by PDPA 2010. Government and regulated-workload data may be ring-fenced to a sovereign-cloud landing zone on request.

6. References

6.1 Public-listed financial-services conglomerate — 18-month engagement, 32 workloads migrated, completed 2025.

6.2 ASEAN-headquartered energy group — landing-zone + 14 workloads, completed 2024.

6.3 Government-linked transportation operator — sovereign-cloud landing-zone, ongoing.

Detailed reference contact details available on request under NDA.

7. Assumptions, Exclusions & Open Items

7.1 Assumption — Zava provides existing application architecture documentation within 14 days of award.

7.2 Exclusion — Application code remediation for non-cloud-ready workloads is out of scope and would be a change order.

7.3 Open item — Sustainability / Scope-3 emissions reporting commitment NOT included in this response. Asianova Systems can provide a separate proposal on request.
